MAKING CHANGES

Public contributions: Changes on our maps are sent to OpenStreetMap too.

Private contributions: Changes are kept only on our maps (to be pushed to OSM later).

Pros:

- Add data of interest
- Protection against harmful changes

Cons:

- More complexity

OUR EXPERIENCE

We can currently serve slippy/static maps:

- for **7 partners across Europe,** consuming **+15M tiles/day**
- with **different styles**
- supporting **8 languages**

We also have future plans:

- **vector tiles**
- **layers 3D**
- **improve validation**
- **...**

CONCLUSIONS

1. Consider if switching to OSM can really **help your business**.

2. There are **issues to address**, especially at the beginning.

3. **Support OpenStreetMap**.
