

# OpenMapTiles: Vector tiles from OpenStreetMap

Petr Pridal <[petr.pridal@maptiler.com](mailto:petr.pridal@maptiler.com)>

Jiri Komarek <[jiri.komarek@maptiler.com](mailto:jiri.komarek@maptiler.com)>

SOTM 2018, Jul 28th, Milano, Italy

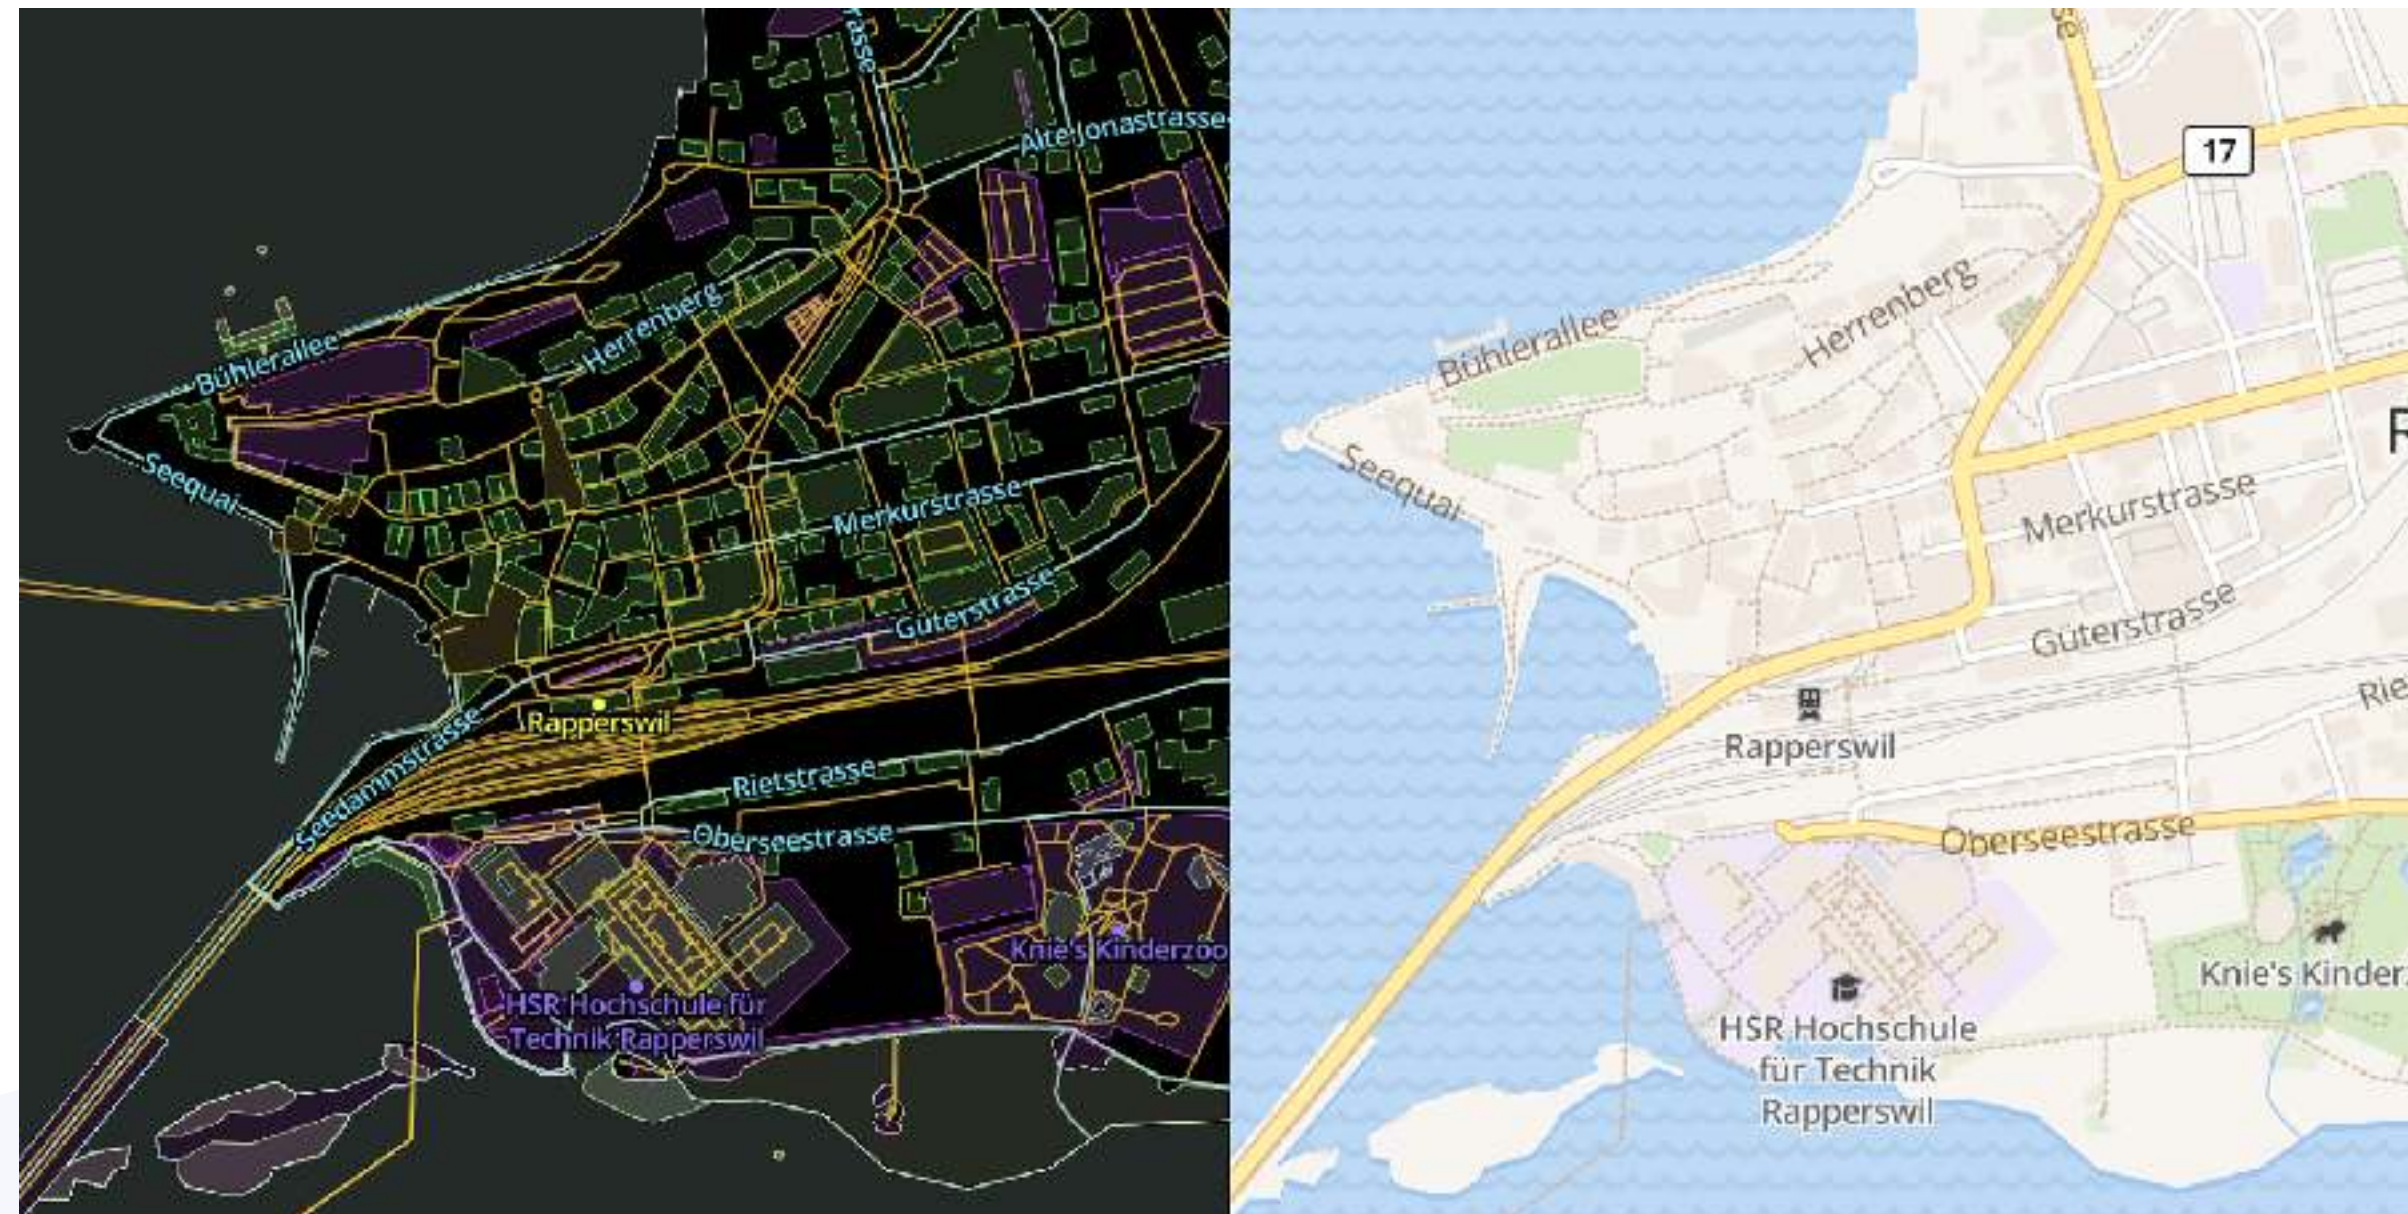

# About OpenMapTiles

- Open-source tools for vector maps
- <https://openmaptiles.org/>
- <https://github.com/openmaptiles>
- Successor of OSM2VectorTiles
- Launched January 2017

# Map tiles

- Open Vector Tile Schema
  - Description of thematic data layers and attributes
  - Documented and extensible
- Tools for generating vector tiles
  - Creates MBTiles containing PBFs (MVT)
- Open Map Styles
  - Prepared styles for the tile schema
  - Easy to customize

# DEMO

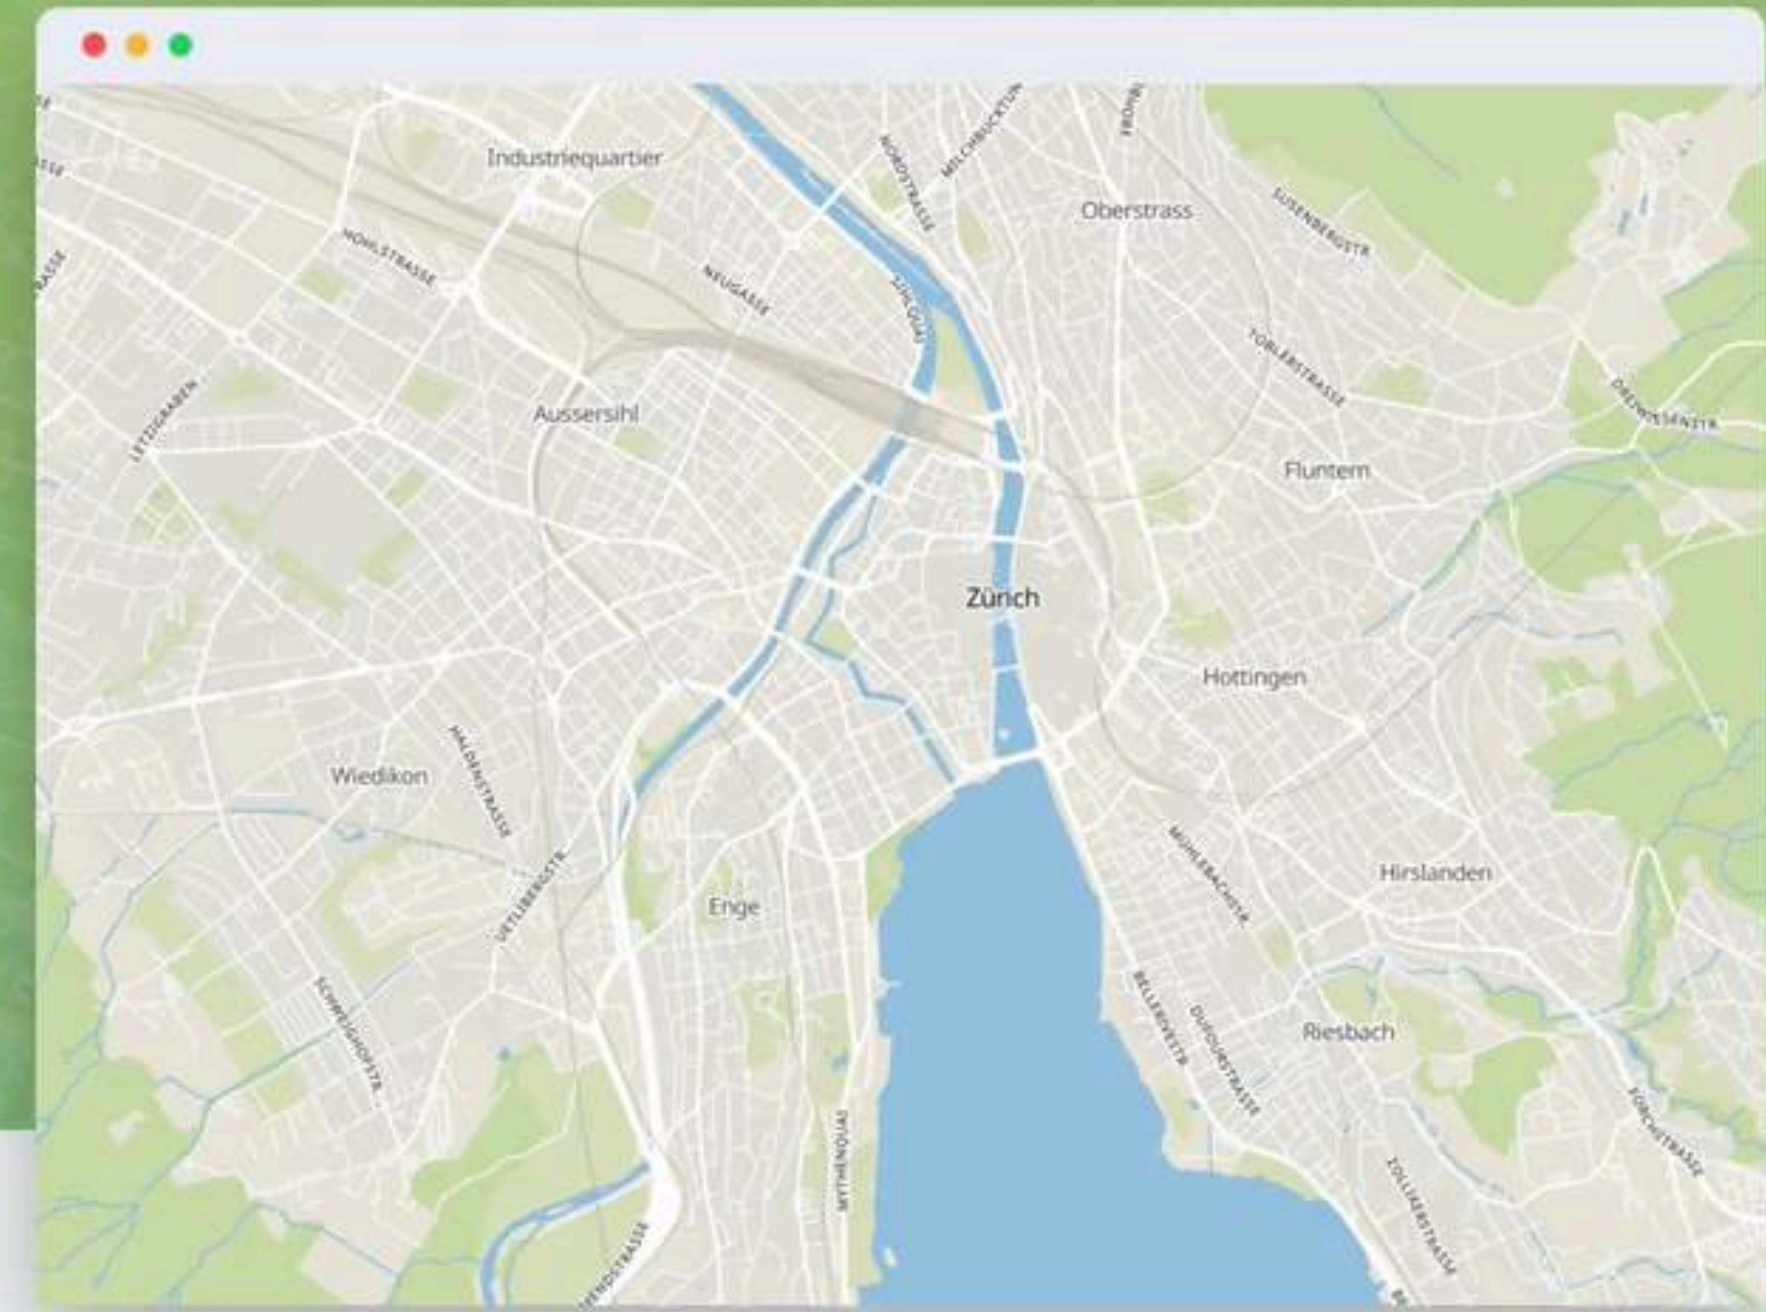

# Using OpenMapTiles

[www.openmaptiles.org](http://www.openmaptiles.org)

# Open-source maps made for self-hosting

Free OpenStreetMap Vector Tiles

Trusted by

# Choose your favourite server

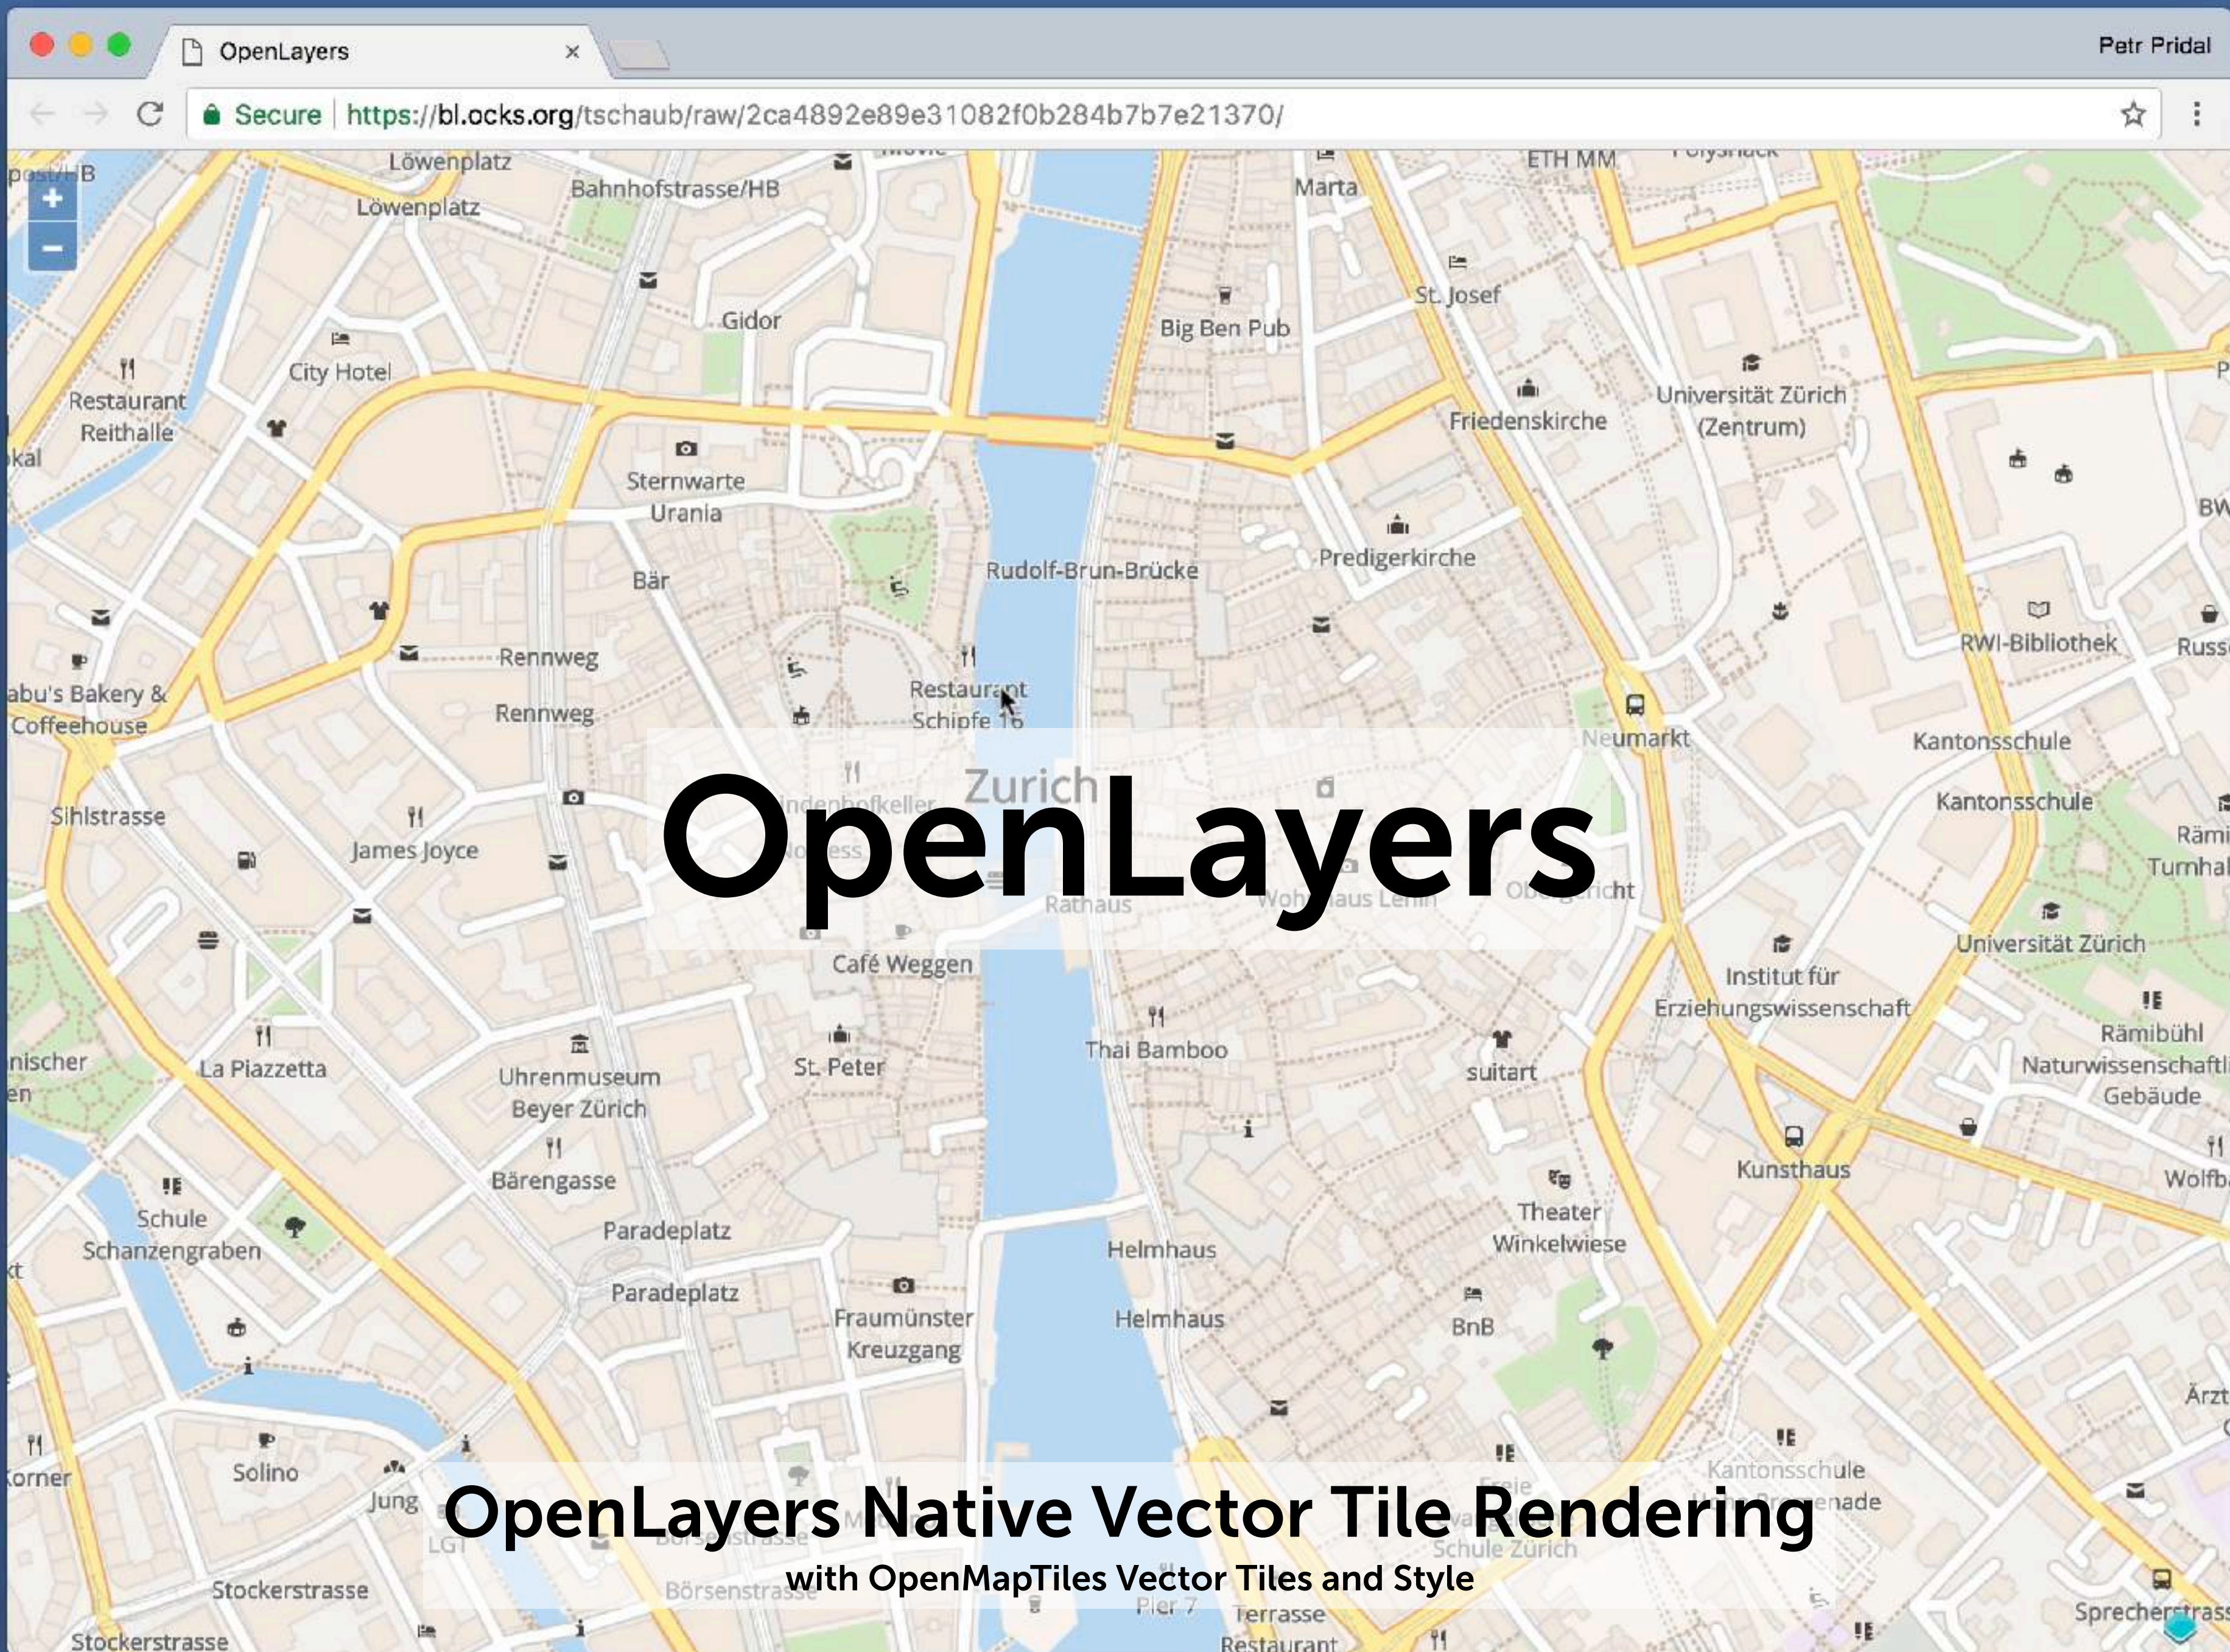

- OpenMapTiles Server (vectors, rasters, WM(T)S, custom styles & data, ...)
- TileServer GL Light (vectors only, pure JavaScript, node.js)
- TileServer GL (vectors + rasters using Mapbox GL Native, node.js/C++)
- TileServer PHP (vectors only)
- Tessera (powered by Tilelive)
- Postserve (on demand using ST\_AsMVT)

# Choose your favourite client API / SDK

- JavaScript API: OpenLayers, MB GL JS, Leaflet, WebGL Earth, ...
- Mobile SDKs: MB GL for iOS / Android, Carto SDKs, ... *OpenMapTiles app*.
- Desktop: QT Location, VectorTileRender .Net/C#, MapSui, ...
- Games: Unity, ...
- QGIS native plugin, ArcGIS compatibility

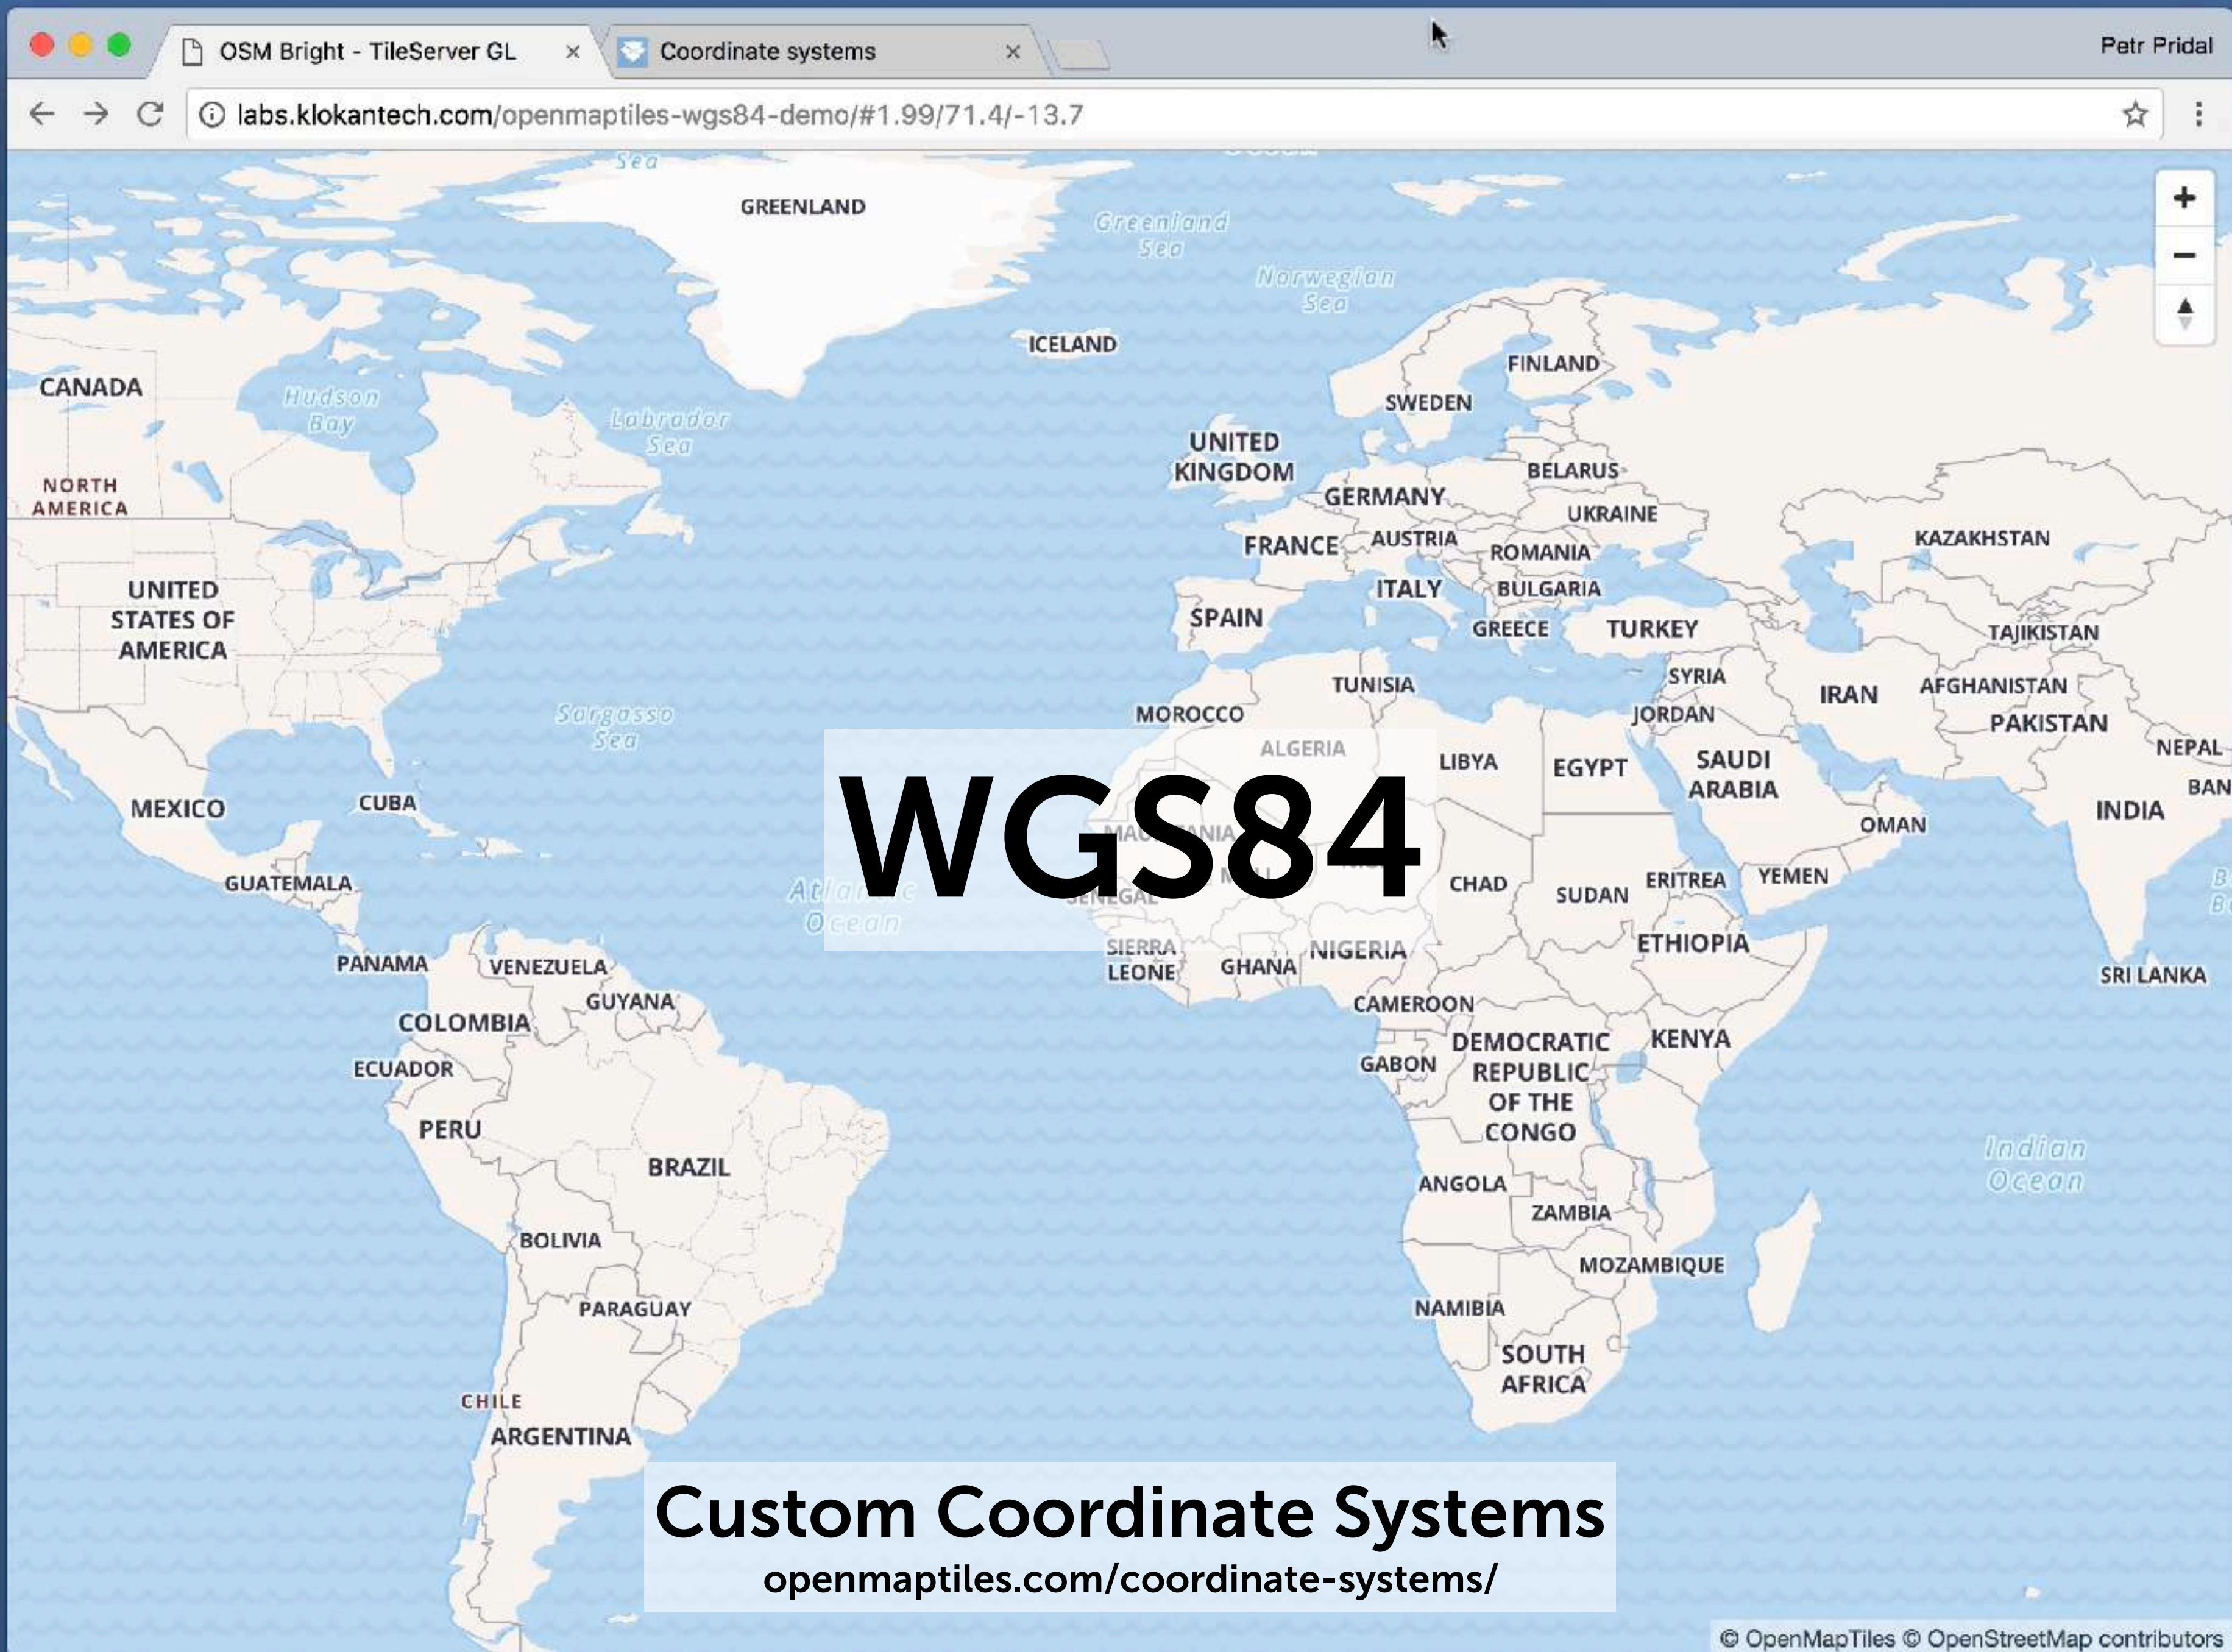

Leaflet 

# OpenLayers

**OpenLayers Native Vector Tile Rendering**  
with OpenMapTiles Vector Tiles and Style

**WGS84**

**Custom Coordinate Systems**  
[openmaptiles.com/coordinate-systems/](https://openmaptiles.com/coordinate-systems/)

# Modifying OpenMapTiles

- Anybody can generate OpenMapTiles
- Tutorials <https://openmaptiles.org/docs/>
- Requires Docker and Docker Compose
- Large areas can take some time
- Don't have to do that (downloads available)

# How to turn OSM into vector tiles

- Import OSM data into database (imposm3)
- Spatial database to integrate, preprocess, query (PostGIS)
- Encode a query for each tile as vector tile (Tilelive Mapnik)

## Layers

- aerodrome\_label
- aeroway
- boundary
- building
- houenumber
- landcover
- landuse
- mountain\_peak
- park
- place
- poi
- transportation
- transportation\_name
- water
- water\_name
- waterway

## Tools

Style editor

The vector tile schema describes how the vector data is organized into different thematic layers and which attribute and values each layer contains. This is useful for writing a map style and allows for alternative implementations of a schema.

The OpenMapTiles schema is open (CC-BY) and you are free to use, extend or build upon the existing implementation (BSD license). Please reference OpenMapTiles if you build upon the schema.

The vector tile schema has been developed by Klokan Technologies GmbH and was initially modelled after the cartography of the Carto Basemap Positron. The vector tile schema has been refined and improved in cooperation with the Wikimedia Foundation and is heavily influenced by the many years Paul Norman's experience of creating maps from OpenStreetMap.
